

# DEMO #7: PCR WITH OPERATIVE AI

## OCR WITH GENERATIVE AI

The Use Case is developed to eliminate the costly, error-prone task of manually entering supplier documents into SAP.

**'Turn documents into data—automatically.'**

### Product Description

- ✓ **Direct PDF Upload:** End-users can upload supplier documents in PDF format directly into the system.
- ✓ **AI-based Data Extraction:** Automatically reads and parses data from PDFs using AI.
- ✓ **Smart Suggestions:** Suggests missing values based on historical business data, even if not present in the document.

### Product Goals and Objectives

- ✓ **Reduce Manual Effort:** Minimize time spent on repetitive data entry tasks
- ✓ **Enhance Accuracy:** Improve data consistency and reduce human errors
- ✓ **Scale Efficiently:** Seamlessly process over 1,000 documents per month
- ✓ **Empower Users:** Provide a simple, automated upload experience for end-users

### Why It Matters

- ✓ **Saves Time:** Cuts down hours of manual entry each month
- ✓ **Reduces Risk:** Minimizes costly errors in procurement and fulfillment
- ✓ **Empowers Users:** Makes document handling easier for non-technical staff

### Functional Benefits

- ✓ Reduce manual effort to input data

Operation

Business

### Functional Benefits

- ✓ Build intelligent enterprise with AI
- ✓ Target to apply to more processes other than SD
