QaiDora Mask

A New Era of Digital Content Moderation

QaiDora Mask is an intelligent, automated content moderation solution that helps broadcasters, pay-TV services, and content developers monitor and protect livestream and digital platform content from inappropriate elements.

Powered by advanced artificial intelligence, *QaiDora Mask* can instantly detect and handle controversial visuals such as football betting logos, inappropriate ads, or offensive imagery —ensuring programs comply with regulations while maintaining high broadcast quality.

Why choose us?

<5s
Detection & processing time for violations

>95%
Accurate identification of inappropriate content

↓70%
Manual workload

Optimize operations & Reduce staffing needs
Cut operational costs and streamline resources while ensuring high image quality and moderation standards.

Comply with local culture & regulations
Help content businesses stay compliant with legal standards while maintaining credibility and viewer trust.

Real-Time Content Editing
Eliminate risks of inappropriate visuals during live events, minimizing potential penalties and brand damage.
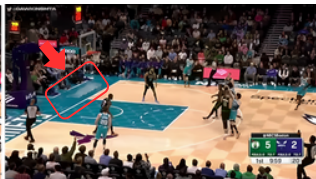

TV stations and content publishers must proactively edit and prevent the appearance of visuals that violate Vietnamese laws during live broadcasts. Such violations can lead to legal consequences, financial loss, and reputational damage for broadcasters and content providers.

Direct intervention in satellite feed
