

QaiDora Vision

*Transforming video data
into breakthrough actions*

QaiDora Vision – A smart video analytics platform that transforms any IP camera into an automated monitoring system for various industries.

Powered by advanced AI, **QaiDora Vision** can detect behaviors, identify objects, and perform near-real-time searches to help users quickly detect threats such as theft or potential dangers involving children, the elderly, etc. Suitable for individuals, families, warehouses, factories, retail stores, shopping centers, transportation systems, financial institutions, and more.

Why choose us?

95%

Accurate detection of abnormal behaviors

<5s

Near real-time alert notifications

↓ 70%

Investment cost in video data analysis infrastructure

Key Features

High-accuracy surveillance

Detect and alert urgent situations promptly. Helps protect assets and ensure safety – ideal for environments like companies, factories, and households.

Smart recognition with continuous tracking

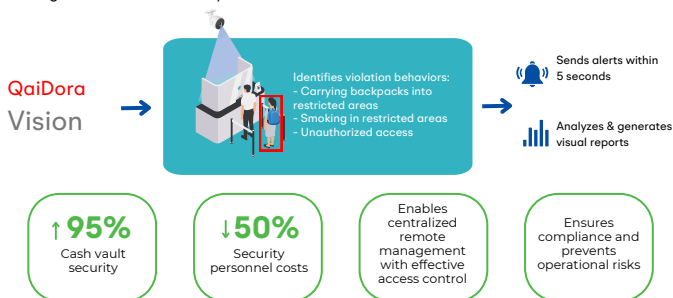

Ability to link and synchronize data from multiple cameras for seamless tracking, leading to more accurate analytics.

Optimized infrastructure with Q.Vision Box

Compact hardware reduces infrastructure investment by up to 70%, streamlining operations and future management.

SECURE CASH STORAGE IN BANKS

A bank was losing trillions of VND each year due to poor oversight in cash vaults and weak enforcement of access compliance. To enhance security, they implemented the AI-integrated **QaiDora Vision** system.

RETAIL STORE MANAGEMENT SUPPORT

Retail stores with hundreds of daily visitors need an automated solution to track customer entry/exit, detect employee violations, monitor security, and alert theft risks.
